SUS Evaluation Report

Project Name: Moodle Usability

Description: Moodle is a platform widely used in different Centres of the University of Guadalajara, Mexico to support academic resources, hybrid or fully online courses.

System Usability Scale The SUS (System Usability Scale) questionnaire is a simple, reliable and widely used tool to assess the usability of a system, product or service. It was developed by John Brooke in 1986 and consists of 10 items that are answered on a 5-point Likert scale, ranging from "Strongly Agree" to "Strongly Disagree".
